

Timesheet Pro

Submitted By: Nandakumar Manoharan

Cohort - 48

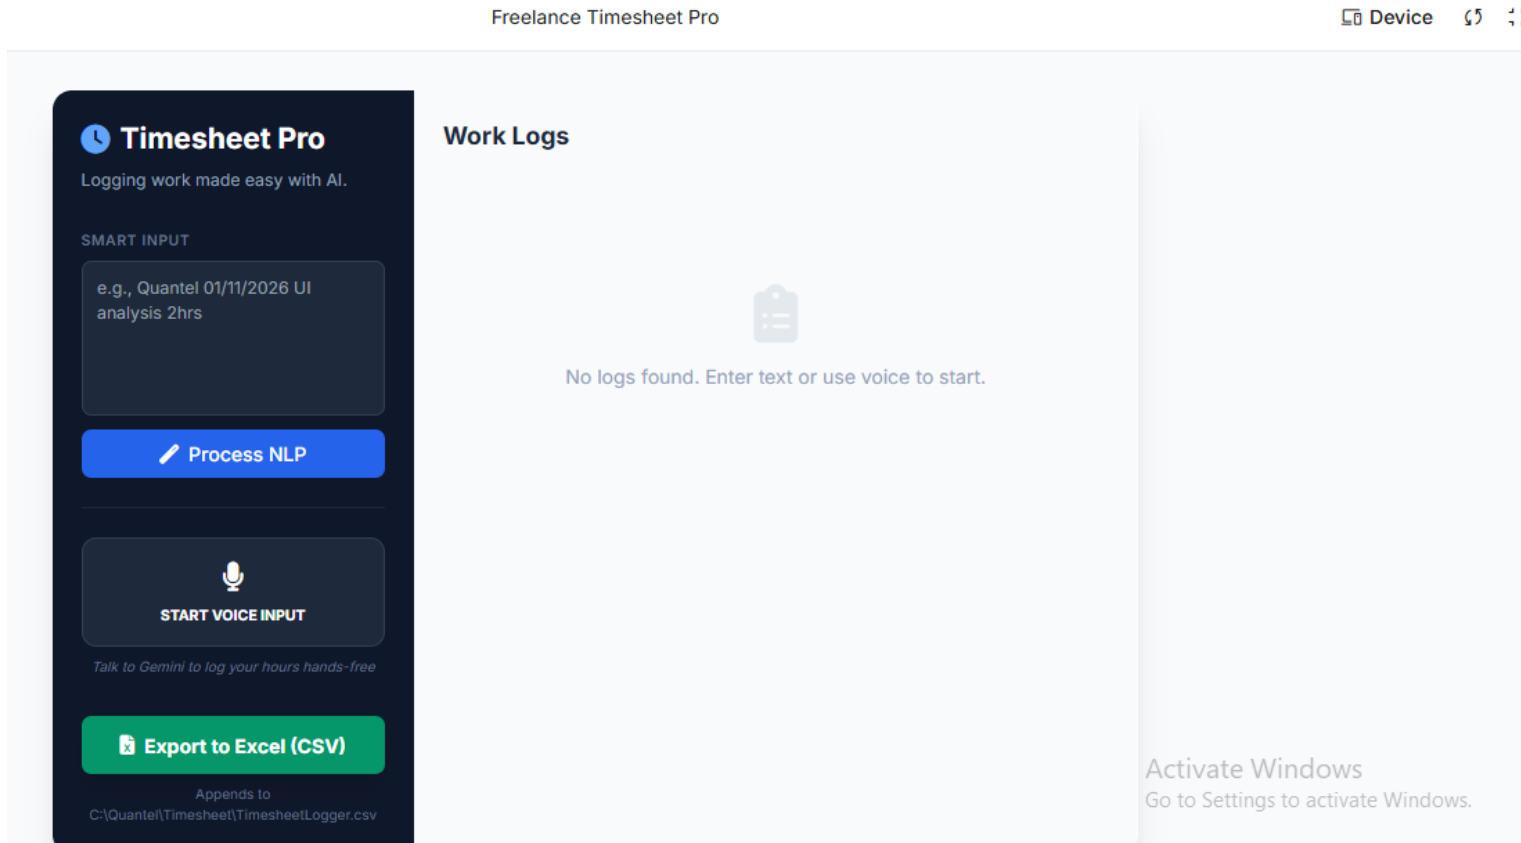

Problem Statement

- As a freelancer, it is always important to log and get the timesheet approved by investors to get the payment
- Daily Manual entry of timesheet as excel is hard to manage and causes delay in invoice submission
- Chances are some of the entries that we plan to enter during weekends might get missed out

Solution

- Bring in a NLP feature in timesheet submission app wherein all the daily tasks that are typed are parsed into necessary timesheet entries
- Along with Text, Audio input also is included so that it'll be very easy to say the work done in this App and it is converted to necessary timesheet entries
- Similar feature can be included in all Timesheet entry apps like Keka, ADP, Peoplesoft etc..

Demo

Data entered is saved under specific client entries

- Enter Data in Natural Language and Voice input
