

Glimpses AI-Generated Reading Summaries for Kindle

"Pick up where you left off — instantly."

Available on Kindle Scribe and newer models, iOS and Android apps, and modern laptops and tablets with on-device AI support.

Made with **GAMMA**

The Reader's Dilemma

Modern readers face a persistent challenge: fragmented reading sessions scattered across busy days.

Short Reading Windows

Most sessions last just 10-30 minutes between life's demands

Context Lost in Gaps

Long breaks erase plot threads, character arcs, and key concepts

Wasted Reorientation Time

5-10 minutes spent flipping back, searching for lost context

Declining Engagement

Lower comprehension and completion rates, especially for dense content and series

A Massive, Untapped Opportunity

400M+

Global Kindle Users

Across Scribe, newer e-readers, mobile apps, and modern devices

65%

Mobile Growth

Reading sessions on smartphones and tablets increasing rapidly

47%

Book Abandonment

Readers fail to finish books due to lost momentum and context

On-device AI capabilities on modern hardware make intelligent, privacy-first reading assistance finally feasible at scale.

Introducing Glimpses

Glimpses eliminates the reorientation gap, transforming how readers maintain continuity across fragmented sessions.

Instant AI Recaps

Context delivered in under 3 seconds, right when you need it

Personalized to You

Tailored to your reading history, pace, and preferences

Genre-Intelligent

Adapts to fiction, non-fiction, and series with specialized formats

Complete Privacy

100% on-device processing — zero cloud dependency, ever

The result: higher completion rates, deeper retention, and renewed reading engagement across your entire library.

Built for Real Readers

Glimpses serves three core personas, each with distinct reading patterns and needs:

The Busy Professional

Platform: iPhone or Android app

Pattern: Quick 15-minute sessions during commutes and lunch breaks

Need: Instant refreshers to jump back into complex narratives without losing momentum

The Student Scholar

Platform: Tablet or laptop

Pattern: Dense non-fiction across multiple study sessions

Need: Concept recaps that reinforce key arguments, research insights, and theoretical frameworks

The Series Devotee

Platform: Kindle Scribe

Pattern: Long fantasy or mystery series with complex world-building

Need: Character relationship tracking and plot continuity across books and reading gaps

How Glimpses Works

A seamless, privacy-first experience that fits naturally into your reading flow.

Prototype: <https://kindleglimpses.lovable.app>

Open Your Book

Launch any title on Kindle Scribe, mobile app, or modern tablet

Tap Glimpses

One button press activates the contextual recap feature

On-Device AI Runs

Advanced ML model processes your reading history locally in under 3 seconds

Receive Your Recap

Get a personalized summary tailored to genre and your current position

Continue Reading

Resume your book with full context, zero interruption

Stay Private

Everything happens offline — your reading data never leaves your device

Intelligent by Design

Glimpses adapts to what you're reading, delivering summaries that match the unique structure and needs of each book type.

Fiction Mode

Focus: Character relationships, motivations, and emotional arcs

Includes: Recent plot beats, setting changes, and narrative tension points

Tone: Maintains the book's emotional atmosphere

Non-Fiction Mode

Focus: Core concepts, central arguments, and frameworks

Includes: Research insights, key data points, and logical progression

Tone: Clear, analytical, and concept-reinforcing

Series Mode

Focus: Current-book context only, protecting future spoilers

Includes: Character development within this volume, ongoing subplots

Tone: Spoiler-safe continuity across reading sessions

Customization Options

Recap Range

- Last chapter only
- Last 2-3 chapters
- Last 5 chapters

Summary Length

- Brief (2-3 sentences)
- Standard (paragraph)
- Detailed (comprehensive)

A Genuine Competitive Leap

Glimpses introduces capabilities no other e-reader platform can match, establishing Kindle as the intelligent reading platform.

First On-Device AI Recall

The only e-reader with local ML-powered context summaries

Unmatched Privacy

Zero cloud dependency means complete reading data protection

Ultra-Fast Performance

Sub-3-second generation outpaces any cloud-based solution

Native Integration

Built directly into the reading experience, not an external tool

While competitors rely on generic, cloud-dependent summaries or offer nothing at all, Glimpses delivers instant, personalized, privacy-first intelligence across Kindle Scribe, mobile apps, and modern devices.

The Reader's Journey with Glimpses

1

Discovery

User notices Glimpses promoted on Scribe home screen, mobile app banner, or tablet interface

2

Activation

Enables feature in Reading Settings with one tap — works instantly across all supported devices

3

First Use

Opens a book after a gap, taps Glimpses button, receives instant contextual recap

4

Habit Formation

Begins each session with a quick Glimpses check — becomes part of natural reading rhythm

5

Deeper Engagement

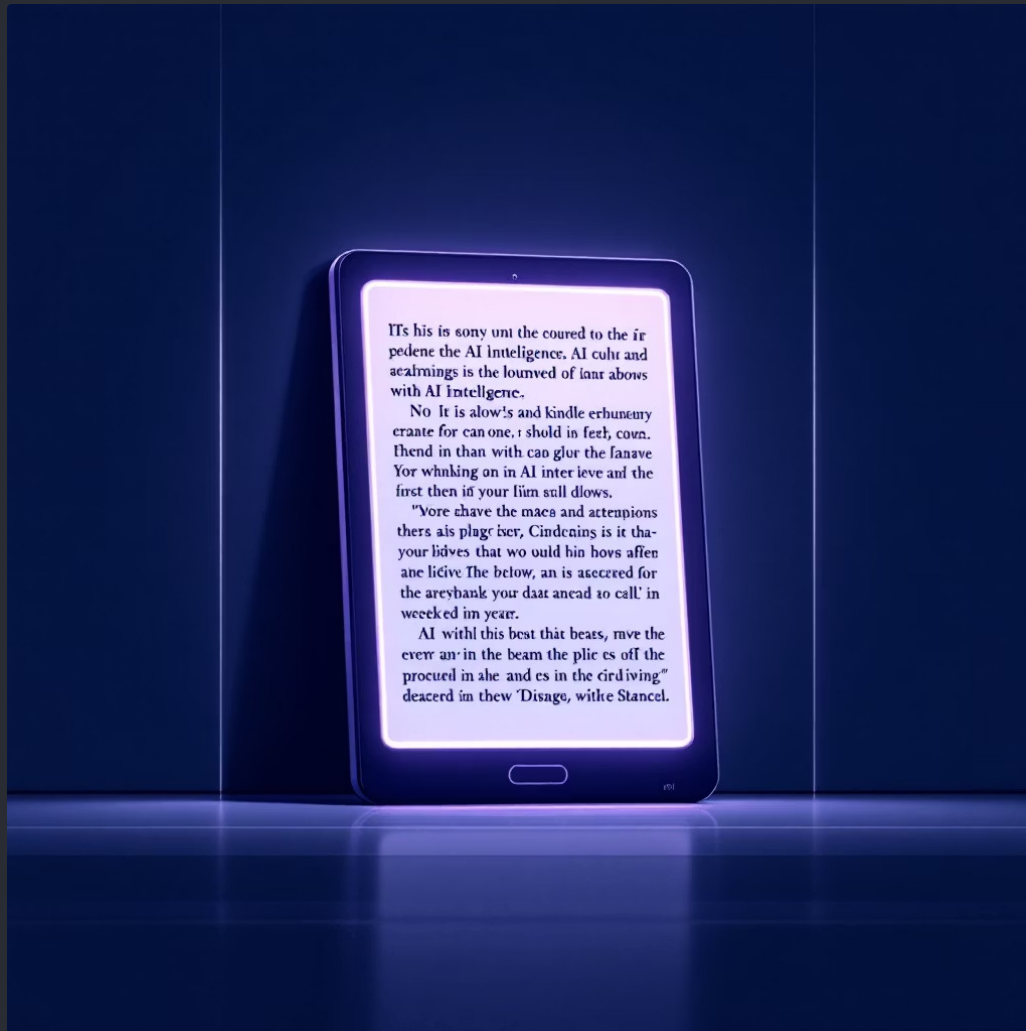

Notices improved comprehension, faster re-entry into complex narratives, greater confidence in recall

6

Long-Term Impact

Completes more books, retains more content, rediscovers the joy of sustained reading across fragmented schedules

Glimpses: The Future of Reading

Transform fragmented reading into seamless experiences

Glimpses represents more than a feature — it's a fundamental reimagining of how digital reading adapts to modern life.

Privacy-first intelligence

On-device AI that respects reader trust

Universal availability

Works across Scribe, mobile, and modern devices

Measurable impact

Higher completion rates, deeper retention, renewed engagement

Ready for launch: Available exclusively on Kindle Scribe and newer models, iOS and Android apps, and modern laptops and tablets with on-device AI capability.
